

CASE STUDY

INVOICE PROCESSING

DEPARTMENT: ACCOUNTS & FINANCE | INDUSTRY: MEDIA

100% Transaction Accuracy Achieved in Invoice Processing with RPA

ABSTRACT

India's leading news channel automated its invoices for bulk upload, non-PO, and PO, using our customized RPA solution and was able to save time and eliminate the efforts of 4-5 employees. Our customized RPA solution helped the client process invoices more efficiently, resulting in faster turnaround time and improved accuracy.

OUR CLIENT

Leading news channel in **India**, having **regional channels** across **India**

Our client is a leading news channel in India with a wide network of correspondents and reporters. They have several regional channels across the country and aim to provide fast and up-to-date news coverage to viewers.

THE PROBLEM

The finance team receives over 450 approved invoices daily from various departments and processing such a high volume of invoices manually was time-consuming and challenging. Daily, 4-5 employees would process these invoices, share the MIS with stakeholders, and make payments.

Slow turnaround time

Transaction Errors

Low Productivity

THE SOLUTION

RPATech deployed a team of experts to assess the client's business process and requirements. After understanding their needs, our experts developed a customized RPA solution to automate the entire invoice processing. The bot performed tasks such as extracting data from invoices, validating details against the client's ERP, matching invoices with correspondent POs, and processing payments.

Source Applications:  

MANUAL EXECUTION

Finance Team receives bulk Upload, Non-PO, and PO invoices after approval from various departments.

Manually enters details in ERP

Finance team processes payment.

Stakeholder approves payment

Finance team manually enters details in their record-keeping system.

BOT EXECUTION

Bot receives approved invoices via email

Bot Downloads attachment in specified location

Bot Extracts all mandatory fields and updates in database table

Bot receives approved invoices via email

Bot Log into SAP

Bot Processes invoices, matches payment details, shares MIS for payment approval and processes payment.

BUSINESS OUTCOMES

Turnaround time reduced by **90%**

Transaction accuracy improved to **100%**

ABOUT RPATech

RPATech is an RPA Consulting, Services, and Solutions provider, classed among the top Intelligent Automation companies by industry analysts. We consult organizations on leveraging the right RPA platforms and artificial intelligence technologies and design and develop RPA bots using RPA, AI, and ML to automate our customers' business processes.

We are partners with top RPA vendors, such as UiPath, Automation Anywhere, and Microsoft. We work on enhancing the capabilities of these automation platforms by infusing AI, BI, workflow, and other technologies, ensuring improved outcomes and a better automation experience for their customers. We have helped our clients to increase their efficiency, save costs and increase competitiveness by discovering automation potentials and designing, developing, and optimizing its processes.

Contact RPATech to learn more about how you can leverage our automation solutions to implement automation of any process, scale your business, and reduce costs.
